no software to install

converge

Play all your music, all over your home, from virtually any audio source imaginable!

In this digital age your music lives on your computer, but your computer doesn't live where you want to listen to your music... That's all about to change. Eos Converge brings the music from your computer, home audio system or virtually any other music source, into every room of your house... all wirelessly with pure digital sound quality. Eos Converge streams pure digital, CD quality audio everywhere -- through walls, floors, doors and ceilings, upstairs, downstairs, inside and out up to 150 feet away from the transmitter... and to as many as 4 wireless receivers or speakers. Converge features Auto-Link technology so receivers and transmitters link automatically right out of the box, no configuration or WiFi network required. For the ultimate in control, use your iPod Touch or iPhone and Apple's Remote App to control your iTunes library and wirelessly stream your music everywhere!

Converge is easy, just plug and start playing... no complicated connection, no mind-bending set-up, no tearing up walls.

Play all your music, all over your home, from virtually any audio source imaginable!

Apple's Remote App

Use the Converge Wireless transmitter with your Mac or PC and you have the ultimate remote control. Just use any iPod Touch or iPhone and Apple's Remote App to search, select and play music, from your iTunes library on Mac, PC or Apple TV. The Remote App also enables users to display album cover artwork on their iPhone or iPod Touch as well as control the system volume to all Eos Converge wireless receivers.

Wireless Transmitter

The Converge Wireless Transmitter is extremely versatile... it lets you play all your music, all over your house from virtually any audio source imaginable. With Auto=link technology transmitter and receivers connect automatically right out of the box. Connect the Eos Receiver to the USB port of your Mac or PC and stream music from iTunes or other music media player, even internet radio stations like Pandora, Rhapsody, Last FM and more!

Wireless Receiver

The Converge Wireless Receiver is designed to connect to the audio equipment that you already own -- main home audio system, home theater system, or to amplified stereo speakers. Function buttons allow remote control of playback and track functions on iTunes or other software based music players.

Amplified Wireless Receiver

The Converge Amplified Wireless Receiver packs big system sound in a small package -- all you have to do connect your choice of speakers. The Amplified Wireless Receiver features a premium quality Class D amp for awesome sound in any room. Function buttons allow remote control of playback and track functions iTunes or other software based music players.

Eos Loudspeakers

Eos Loudspeakers are acoustically matched to complement to the Amplified Wireless Receiver. Audiophile quality speakers are designed to give you great sound in any room environment. Eos Loudspeakers feature 5" woofers and 1" silk tweeters in a Bass Reflex enclosure design for incredible deep sounding bass, rich midrange and crystal clear highs.

Eos Portable Wireless Speaker System

Wireless multi-room audio has never been easier. Just plug an Eos portable wireless stereo speaker/receiver into any wall outlet, inside or out and turn up the volume...or remove the power supply for bookshelf or table to use. The Eos Portable Wireless Stereo Speakers feature an integrated amplifier, 2 neodymium tweeters and a ported backfiring subwoofer, for great sound in a very compact package.

† Cabinet enclosure made of high-quality anodized aluminum.
